Abbreviations: COVID-19 = coronavirus disease 2019.

* Housing unit capacity (persons per unit) was 65 for units 1–9 and 11, 50 for units 10 and 13, 52 for unit 12, 240 for unit 14, and 150 for unit 15.

† Unit 10 was the intake unit; unit 15 was the dormitory-style unit.

§ Additional COVID-19 cases identified in units 3 (n = 4), 12 (n = 1), 13 (n = 7), and 14 (n = 1) on September 14 due to symptomatic testing, not unit testing, are excluded.

¶ Cells highlighted in green present percentage values below the 50th percentile; cells highlighted in yellow present percentage values at or near the 50th percentile; and cells highlighted in red present percentage values above the 50th percentile. Cells highlighted in gray indicate that SARS-CoV-2 testing was not offered to all incarcerated persons living in the housing unit.

** The mass testing event on October 19 is not shown as the housing locations of tested incarcerated persons were not available.

†† Dashes indicate not applicable because SARS-CoV-2 testing was not offered to all incarcerated persons living in the housing unit.
